Hello my name is Joseph Morabito. I'm attending BCIT in a 2 year program in web technology also a social media digital marketing certification. These 2 certifications will finish at the end of this November 2022. I specialize in various coding languages including HTML5, CSS3, PHP, jQuery,, Bootstrap, Wordpress, CMS, and Mobile web design. I've worked in quality assurance and It would be outstanding to put my experience and knowledge to the test and join your team.

Downie Timber Ltd.
Quality Control/Assurance
16 years in the Quality Control field handling software installs, upgrades, product updating, computer failovers, also scanner calibrations and implications.

HTML5 is a markup language used for structuring and presenting content on the World Wide Web. It is the fifth and final major HTML version that is a World Wide Web Consortium recommendation. The current specification is known as the HTML Living Standard. Wikipedia
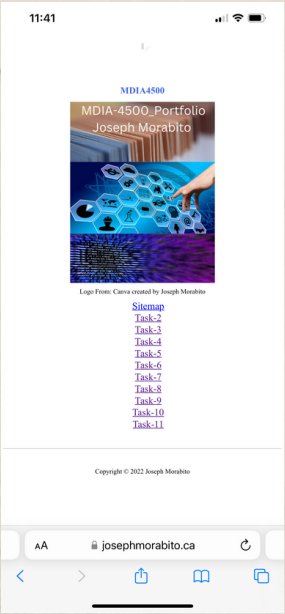

Cascading Style Sheets (CSS3) is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML (including XML dialects such as SVG, MathML or XHTML).[1] CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript. Wikipedia

PHP is a general-purpose scripting language geared toward web development. It was originally created by Danish-Canadian programmer Rasmus Lerdorf in 1994. The PHP reference implementation is now produced by The PHP Group. Wikipedia
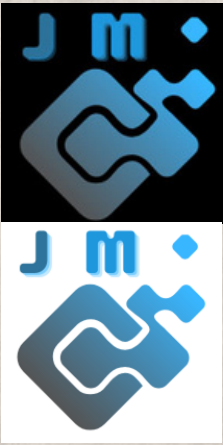

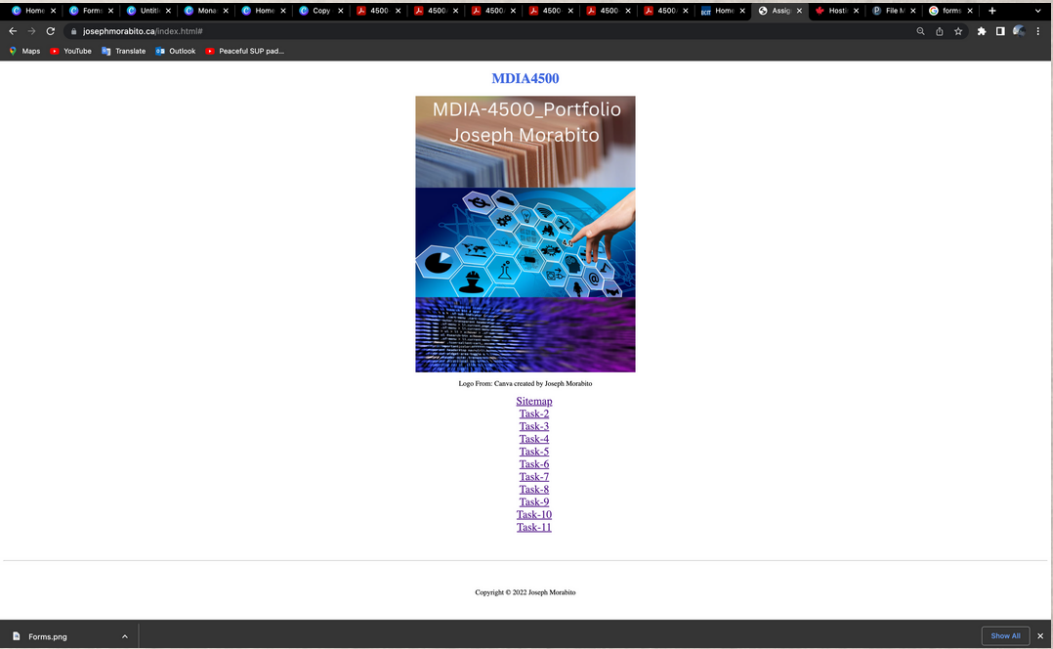

A webform, web form or HTML form on a web page allows a user to enter data that is sent to a server for processing. Forms can resemble paper or database forms because web users fill out the forms using checkboxes, radio buttons, or text fields. For example, forms can be used to enter shipping or credit card data to order a product, or can be used to retrieve search results from a search engine. Wikipedia

RWD Responsive Web Design allows you to have your website fit all screen devices and size of device with keeping the look and feel of the same website.

The image on the left is an example of my work site on a mobile device the iphone 12 Pro

The image on the right is an example of my work site on a desktop view.

Design tools I work with and specialize in. Photoshop is one of my main tools to properly get photos to where they have to be in order to display properly and professionally on the world wide web.

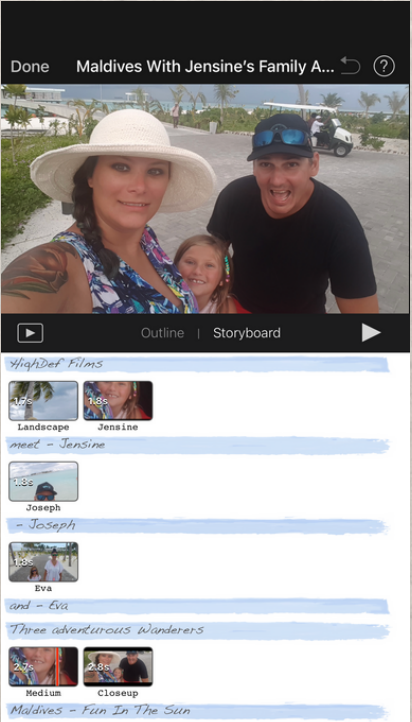

This is the photo before corrections, notice the glare on the bottom left of image, also notice the top left and right corners have a lense shadow in it.

This is the photo after corrections.were made.

Premiere Pro is what I use for creating the video quality, seamless transitions, and make a website that isn't top heavy to reduce lag time.
